

TABLE OF CONTENTS

Part A: Use of Handbook	<i>Page No.</i>
1. Scope	1
2. Nomenclature	2
3. Definitions	3
4. General Principles	4
5. Procedure for Determination of Material Thickness	8
6. References	13
Figure 1: Blocking of Rib Voids	4
Figure 2: Standard Thermocouples Locations for Three-Sided Members	5
Figure 3: Application of Regression Formula	6
Figure 4: Cases for Calculation of Exposed Surface Area to Mass Ratio	10
Table 1: Exposed Surface Area to Mass Ratio for BHP Steel Sections	11
Appendix 1. Basis for Assessment of Materials	14
Appendix 2: Influence of Slab Characteristics on Performance of Three-Sided Members	15
Figure A2.1: Three-Sided Fire Exposure	15
 Part B: Fire Protection Material Data	
Index to Material Data Sheets	18
Material Data Sheets	19
