

ASI INDUSTRY GUIDE

HAND LOADED STEEL SHELVING

DESIGN AND INSTALLATION

AUSTRALIAN STEEL INSTITUTE

FOREWORD

This Industry Guide has been prepared as an initiative of Australian suppliers of hand loaded steel shelving systems. It sets out the basis on which shelving systems should be specified, designed and installed for regulatory acceptance and satisfactory performance.

Steel shelving systems are not structures and are therefore not regulated by building codes although the National Construction Code should be referenced for access and egress requirements of buildings in which shelving systems are installed. The use of shelving is regulated by workplace and fire safety requirements and is the responsibility of the owner or operator of the premises.

This Industry Guide is intended to be used by specifiers, designers, manufacturers, suppliers, installers and customers when establishing minimum requirements for the design, manufacture and installation of any hand loaded shelving included within the scope.

THE AUSTRALIAN STEEL INSTITUTE

The Australian Steel Institute (ASI) is the peak representative body for the Australian steel industry. ASI works to maintain a safe, efficient, productive and sustainable Australian steel manufacturing and design industry. ASI has member groups across steel manufacturing, distribution and downstream processing to design, drafting and detailing, promoting excellence in all aspects of the use of steel.

AUSTRALIAN STEEL STORAGE MANUFACTURERS GROUP

The Australian Steel Storage Manufacturers Group (ASSMG) is a specialist industry group within ASI. ASSMG promotes best practice in the design, manufacture and installation of commercial and industrial steel storage components and systems.

ASI DISCLAIMER

The information presented by the Australian Steel Institute in this Industry Guide has been prepared for general information only and does not in any way constitute recommendations or professional advice. Every effort has been made and all reasonable care taken to ensure the accuracy of the material contained in this publication. However, to the extent permitted by law, the Authors, Editors and Publishers of this publication: (a) will not be held liable or responsible in any way; and (b) expressly disclaim any liability or responsibility for any loss or damage costs or expenses incurred in connection with this Publication by any person, whether that person is the purchaser of this Publication or not. Without limitation, this includes loss, damage, costs and expenses incurred as a result of the negligence of the Authors, Editors or Publishers. Should expert assistance be required, the services of a competent professional person should be sought.

TABLE OF CONTENTS

1	INTRODUCTION	6
1.1	APPLICATION	6
1.2	SCOPE	6
1.2.1	BINNING TYPE SHELVING	6
1.2.2	LONGSPAN TYPE SHELVING	6
1.3	EXCLUSIONS.....	7
2	DEFINITIONS.....	9
3	DIMENSIONS AND TOLERANCES.....	13
3.1	GENERAL.....	13
3.2	COMMON INDUSTRY SIZES.....	13
	BINNING TYPE SHELVING	13
	LONGSPAN TYPE SHELVING	13
3.3	CUSTOM DIMENSIONS	13
3.4	TOLERANCES	13
3.4.1	OUT-OF-PLUMB	13
3.4.2	BAY DIMENSIONS.....	13
3.4.3	OVERALL INSTALLED DIMENSIONS	13
4	MATERIALS	15
4.1	STEEL	15
4.2	FASTENERS	15
4.2.1	SCREWS AND BOLTS	15
4.2.2	SHELF CLIPS.....	15
4.2.3	BEAM CONNECTORS.....	15
4.3	SUSTAINABILITY, DURABILITY AND FINISH.....	15
4.3.1	SUSTAINABILITY.....	15
4.3.2	USAGE ENVIRONMENTS	16
4.3.3	PROTECTIVE FINISHES	16
4.3.4	DECORATIVE FINISHES.....	16
4.3.5	HAZARD MINIMISATION.....	16
5	ANALYSIS AND DESIGN.....	17
5.1	METHODS.....	17
5.2	DESIGN BY CALCULATION.....	17
5.2.1	DESIGN ACTIONS.....	17
5.2.2	ACTION COMBINATIONS	17
	Action combinations - Strength.....	17
	Action combinations - Serviceability.....	17
5.2.3	STABILITY	18
5.2.4	SECTION PROPERTIES.....	18

5.2.5	ANALYSIS.....	18
5.2.6	MEMBER DESIGN	18
5.2.7	JOINT CLASSES	18
5.3	DESIGN BY TESTING	20
6	METHODS OF TESTING.....	21
6.1	EVALUATION OF TEST RESULTS.....	21
6.2	COMPRESSION TESTS OF UPRIGHTS.....	21
6.3	SHELF CLIP SHEAR CAPACITY TEST	21
6.4	SHELF CAPACITY TEST	21
6.5	SHELF TO UPRIGHT FLEXURE TEST.....	21
6.6	BEAM CAPACITY TEST	21
6.7	FULL SCALE TEST.....	21
7	CONNECTIONS AND BRACING.....	22
7.1	METHODS OF RESTRAINT	22
7.2	BASEPLATES AND SHIMS.....	22
7.3	UPRIGHT SPLICES	22
7.4	FRAME CLADDING AND BACK CLADDING	22
7.5	BRACING.....	23
7.5.1	DESIGN OF COMPONENTS TO RESIST HORIZONTAL LOADS.....	23
7.5.2	BRACING CONSIDERATIONS	23
7.5.3	TYPES OF BRACING	23
8.	OPERATIONAL SAFETY	24
9.	INSTALLATION	25
9.1	INSTRUCTIONS	25
9.2	EMERGENCY EGRESS.....	25
9.3	SPRINKLER CLEARANCE	26
9.4	FORCES ON SUPPORTING STRUCTURE	26
10.	COMPLIANCE	27
10.1	IDENTIFICATION	27
10.2	CUSTOMER INFORMATION	27
11.	REFERENCES AND FURTHER READING	28
