List of figures	v	10.7 DESIGN CHECK NO. 7—Design capacity of supported member (Bending of coped section)	19
List of tables	vi	10.8 DESIGN CHECK NO. 8—Beam rotation check	20
Preface	vii	10.9 DESIGN CHECK NO. 9—Local stability of coped supported member	21
About the author	viii	10.10 DESIGN CHECK NO. 10—Local capacity of supporting member	22
About the contributing author and editor	viii	10.10.1 Single-sided connection	22
Acknowledgements	ix	10.10.2 Double-sided connection	23
1 CONCEPT OF DESIGN GUIDE .....	1	11 RECOMMENDED DESIGN MODEL—SINGLE ANGLE CLEAT—SUMMARY OF CHECKS .....	24
1.1 Background	1	11.1 DESIGN CHECK NO. 1—Detailing limitations	25
2 DESCRIPTION OF CONNECTION .....	2	11.2 DESIGN CHECK NO. 2—Design capacity of bolts to supporting member	26
3 TYPICAL DETAILING OF CONNECTION ..	3	11.3 DESIGN CHECK NO. 3—Design capacity of bolts to supported member	27
3.1 Double angle cleat	3	11.3.1 Alternative 'A'—Single line of bolts to supported member	27
3.2 Single angle cleat	4	11.3.2 Alternative 'B'—Double line of bolts to supported member	27
4 DETAILING CONSIDERATIONS.....	5	11.4 DESIGN CHECK NO. 4—Design capacity of angle cleat (Shear, bending, block shear)	28
5 COMPLIANCE WITH AS 4100 REQUIREMENTS FOR CONNECTIONS ...	7	11.5 DESIGN CHECK NO. 5—Design capacity of supported member (Shear—Uncoped or coped)	29
6 BACKGROUND INFORMATION .....	8	11.6 DESIGN CHECK NO. 6—Design capacity of supported member (Block shear—Coped section)	30
7 BASIS OF DESIGN MODEL—DOUBLE ANGLE CLEATS .....	9	11.7 DESIGN CHECK NO. 7—Design capacity of supported member (Bending of coped section)	31
8 BASIS OF DESIGN MODEL—SINGLE ANGLE CLEAT.....	10	11.8 DESIGN CHECK NO. 8—Beam rotation check	32
9 CONNECTION GEOMETRY .....	11	11.9 DESIGN CHECK NO. 9—Local stability of coped supported member	33
10 RECOMMENDED DESIGN MODEL—DOUBLE ANGLE CLEATS—SUMMARY OF CHECKS .....	12	11.10 DESIGN CHECK NO. 10—Local capacity of supporting member	34
10.1 DESIGN CHECK NO. 1—Detailing limitations	13	11.10.1 Single-sided connection	34
10.2 DESIGN CHECK NO. 2—Design capacity of bolts to supporting member	14	11.10.2 Double-sided connection	35
10.3 DESIGN CHECK NO. 3—Design capacity of bolts to supported member	15	12 OTHER DESIGN CONSIDERATIONS .....	36
10.3.1 Alternative 'A'—Single line of bolts to supported member	15	13 REFERENCES.....	37
10.3.2 For Alternative 'B'—Double line of bolts to supported member	15		
10.4 DESIGN CHECK NO. 4—Design capacity of angle cleats (Shear, bending, block shear)	16		
10.5 DESIGN CHECK NO. 5—Design capacity of supported member (Shear—Uncoped or coped)	17		
10.6 DESIGN CHECK NO. 6—Design capacity of supported member (Block shear—Coped section)	18		

	<i>Page</i>
14 DESIGN EXAMPLES .....	38
14.1 Design example No. 1— Connection capacity with single-sided double AC connection to supporting column	38
14.2 Design example No. 2— Connection capacity with single-sided single AC connection to supporting beam	41
15 DESIGN CAPACITY TABLES .....	44
15.1 Configuration A—Double angle cleat single line of bolts to supported member	44
15.2 Configuration B—Double angle cleat double line of bolts to supported member	49
15.3 Configuration C—Single angle cleat single line of bolts to supported member	54
15.4 Configuration D—Single angle cleat double line of bolts to supported member	57
APPENDICES	
A Limcon software	58
